

# MAJOR PROJECT UPDATE

This project is being completed as part of KUB's Century II infrastructure improvement and replacement programs.

**PROJECT TITLE:** Crestwood Hills Area Natural Gas Main Replacement Project

**UPDATE ISSUE DATE:** August 20, 2020

*Please see corresponding maps for work zone referenced below.*

## **UPDATE:**

Following a delay due to heavy rain in the area this week, KUB contractor crews are scheduled to mobilize next week to start the utility service upgrade project to replace the natural gas main and related infrastructure in the Crestwood Hills area of West Knoxville. This project, which includes the replacement of 21,845 linear feet of 2-inch natural gas main, 1,000 linear feet of 4-inch main, and 295 customer service line connections, is scheduled to last through August 2022. The contractor plans to start potholing work to locate existing underground utilities ahead of excavation at the northern section of Roderick Road (near Middlebrook Pike) and work south. Postcard notices were mailed to customers in the immediate area in early August. Area residents are advised that the contractor may need to temporarily close lanes of traffic in the immediate area where work is being performed to facilitate safe access for crews and equipment. Appropriate traffic control measures will be implemented when traffic closures are in effect. Access to driveways will be maintained. KUB will post regular updates throughout the course of this project to keep area residents informed about work areas, traffic impacts, etc. See the attached map for an overview of the construction area. A KUB customer contact is provided on the map if you have questions related to this project.
