

MAJOR PROJECT UPDATE

This project is being completed as part of KUB's Century II infrastructure improvement and replacement programs.

PROJECT TITLE: Halls/Powell Area Electric Upgrade Project (T Line between Emory Road and Cunningham Road)

UPDATE ISSUE DATE: August 27, 2021

Please see corresponding maps for work zones referenced below.

UPDATE:

KUB Overhead Construction crews continue work to upgrade portions of the overhead electric system in the Halls and Powell communities. Crews are presently staging utility poles along Dry Gap Pike and Brickey Road in preparation for installation in the coming weeks. Crews will continue to work in the Brickey Road and Melanie Lane areas next week. The overall project extends along a corridor from the Andersonville Pike substation to the Dry Gap Pike substation in off-road easements between Emory Road and Cunningham Road. The attached map shows the entire length of the construction zone. Tree pruning and vegetation clearance may be required within the utility easement rights-of-way to facilitate safe access and proper clearances. Customers in the vicinity of the immediate work zone may notice temporary elevated noise levels associated with the operation of heavy trucks and equipment. Crews will complete this work during daylight hours. Some weekend work may also be required to facilitate timely completion of this project.
