

MAJOR PROJECT UPDATE

This project is being completed as part of KUB's Century II infrastructure improvement and replacement programs.

PROJECT TITLE: Kuwahee Wastewater Plant Upgrades - Neyland Drive

UPDATE ISSUE DATE: January 18, 2019

Please see corresponding maps for work zones referenced below.

UPDATE:

The section of Neyland Drive east of Joan Cronan Way was temporarily reduced to one lane in each direction for several days this week as KUB's contractor set up traffic control measures for eastbound lane shifts. Now that those measures are in place, traffic flow will resume with two eastbound and two westbound lanes open at all times.

The eastbound curbside lane will be closed as part of construction upgrades at the KUB Kuwahee Wastewater Treatment Plant with the center turn lane and inside lane used to shift traffic and maintain two lanes of flow on this section of Neyland Drive. Both westbound lanes will remain open as normal on this section of Neyland Drive. Due to traffic flow shifting to the center turn lane, eastbound traffic will not be permitted to make left-hand turns on this section of Neyland Drive.

This traffic control pattern will remain in place on this section of Neyland Drive through February 2021.

In addition to the lane shifts on Neyland Drive, there will be intermittent closures on the section of Neyland Greenway located behind the Kuwahee Treatment Plant near the Tennessee River.

This section of Neyland Greenway will otherwise remain open, and KUB will coordinate with City of Knoxville Parks and Recreation to communicate any closures well ahead of time.

The TWRA boat ramp on Neyland Drive will be accessible only to emergency vehicles during this period.
