

## Our Vision:

KUB exists to serve its customers, improving their quality of life by providing utility services that are safe, reliable and affordable.

## Our Mission:

Our mission is to act as good stewards of our communities' resources: utility assets, customer dollars, and the environment. We work to safeguard those resources and enhance their value for the people of the communities we serve and generations to come.

Various Valve and Flow Meter Replacements	Various Pump Station Projects

## About KUB's Small Business Program

First Place Finish was awarded two bids for preparation of new electric substation site and demolition of on-campus CNG station for \$28,517. It's now easier than ever for small businesses to work with KUB! Companies with fifty (50) or fewer employees and less than \$10 million in annual revenue can more easily participate in bid opportunities that fall between \$10,000 and \$100,000, made available through the Small Business Program.

### Program Highlights and Important Information:

- All bonding requirements will be waived.
- Insurance requirements and limits will be relaxed.
- All bidders must sign a verification form called the Small Business Affidavit for a bid to be accepted.
- Bidders must perform at least 51% of the awarded job.

Please reach out to [smallbiz@kub.org](mailto:smallbiz@kub.org) for additional information.

## Prequalification Information

Any contractor wishing to bid on, and perform electric, natural gas, water, wastewater, vegetation management, paving and fiber construction for KUB, must become pre-qualified prior to bidding. Please contact [abigail.morgan@kub.org](mailto:abigail.morgan@kub.org) for additional information.

## Broadband Coming to KUB

KUB was recently approved by its governing bodies and regulators to upgrade its electric grid by installing an extensive fiber system, which will provide a more reliable electricity service, better efficiency, and shorter downtimes in the event of power outages. The fiber system would also enable KUB to offer cheaper, ultra-fast internet to all households and businesses in its electric grid service area.

KUB is currently working on an implementation plan and expects to begin providing broadband services to some customers in late 2022. These services will not immediately be available to all customers in KUB's electric service territory.
