

Quarterly Progress Report

Volume 5

**Second Quarter Report
April 1 through June 30, 2006**

Submitted to EPA on July 27, 2006

0002098

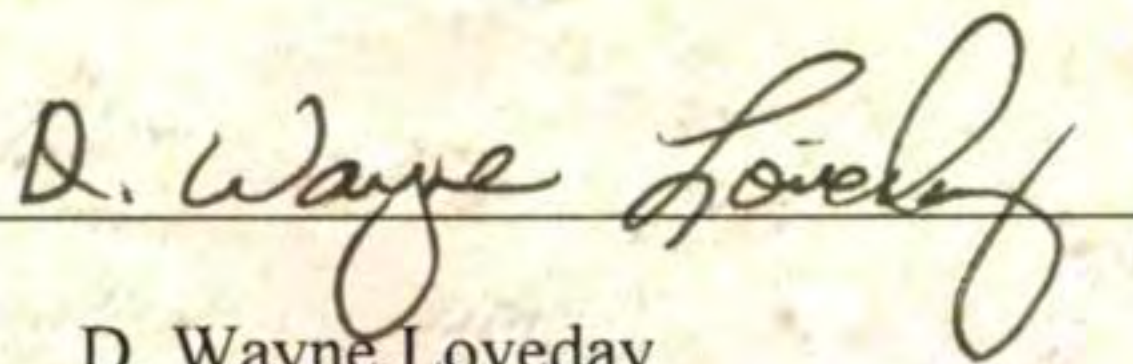

Quarterly Progress Report

Volume 5

Second Quarter Report April 1 through June 30, 2006

Submitted to EPA on July 27, 2006

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering such information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Appendix D Water Quality Monitoring Program Sampling Results	

Executive Summary

On February 11, 2005, the Knoxville Utilities Board (KUB) entered into a Consent Decree with the United States, the State of Tennessee, the Tennessee Clean Water Network, and the City of Knoxville. The following Quarterly Progress Report is submitted to fulfill the reporting requirements described in Section XIX of the Consent Decree.

Consent Decree language, pages 82-83: *"Beginning thirty (30) Days after the first Calendar Quarter following the Date of Entry, and thirty (30) Days after each Calendar Quarter thereafter until termination of the Consent Decree, KUB shall submit to the Parties, and simultaneously place in the PDR, a Quarterly Progress Report. Quarterly Progress Reports shall not be subject to the Public Review Requirement of Section VI.A.2. However, KUB shall receive questions and comments from the public for KUB's review for a period of twenty (20) Days following placement in the PDR. Each Quarterly Progress Report shall contain:*

- 1. A summary of compliance with and activities related to implementation of the Phase 1 CAP/ER and Phase 2 CAP/ER, including: the status of construction projects in comparison to the schedules that have been established pursuant to the Consent Decree for those projects; and schedule deadlines and milestones achieved during Calendar Quarter and expected during the next Calendar Quarter;*
- 2. A summary of compliance with and activities related to implementation of the CPE and CCP;*
- 3. A summary of implementation of and compliance with the Process Controls Program;*
- 4. A summary of the implementation of the Capacity Assurance Program for the Calendar Quarter, including the number of, and anticipated flow from, sewer connections that have been authorized, by Sewerbasin, a description of the projects that have been authorized and the number of credits earned and banked by KUB that will be expended for those projects, by Sewerbasin, and any exceptions granted for connections for essential services;*
- 5. Identification of any transfer of an ownership interest, operation, management, or other control of the Treatment Works, or any portion thereof.*
- 6. A description of the status of compliance or non-compliance with the requirements of this Decree and, if applicable, the reasons for non-compliance, including a list of all violations that are subject to stipulated penalties under Section X of this Decree.*
- 7. A spreadsheet and summary of all SSOs, Bypasses, Diversions and effluent limit violations that occurred during the previous Calendar Quarter. Information on Building Backups may be provided in separate spreadsheets and summaries from other SSOs. The spreadsheets and summaries shall identify:*
 - a. For all SSOs, the location, source, date, time, duration, pathway (if any), receiving water (if any), the reason for each SSO, the total SSO volume, the volume returned to the WCTS, and the volume not captured;*
 - b. For all Bypasses and Diversions, the location, date, time, duration, volume and reason for each Bypass and Diversion; and the total Bypass and Diversion volumes;*
 - c. For all effluent limit violations, all information required to be reported on KUB's Discharge Monitoring Reports.*
- 8. The water quality monitoring data and other information required pursuant to Section VII.D.1.(e).(v). "*

KUB compiled this Quarterly Progress Report to detail the events that occurred during the second quarter of 2006 from April 1 through June 30. This is the fifth quarterly report required of KUB under this Consent Decree. The Consent Decree requirements pertaining to the Phase 2 CAP/ER, Comprehensive Performance Evaluation, and Composite Correction Plan will not be fulfilled in this report since they have not been approved or become due; rather, a description of the status of development for those programs is given. The Consent Decree reporting requirements for those programs will be met after EPA has approved each of them.

Report Organization

Section 1: Phase 1 CAP/ER and Phase 2 CAP/ER – Summarizes the compliance with and activities related to implementation of the Phase 1 CAP/ER, including the status of construction projects in comparison to the schedules that have been established pursuant to the Consent Decree for those projects; and schedule deadlines and milestones achieved during the Calendar Quarter and expected during the next Calendar Quarter.

Section 2: Comprehensive Performance Evaluation and Composite Correction Plan – Summarizes the status of the development of those deliverables.

Section 3: Process Controls Program – Summarizes the implementation of and compliance with the deliverable.

Section 4: Capacity Assurance Program - Summarizes the implementation of the Capacity Assurance Program for the Calendar Quarter, including the number of, and anticipated flow from, sewer connections that have been authorized, by sewerbasin, a description of the projects that have been authorized and the number of credits earned and banked by KUB that will be expended for those projects, by sewerbasin, and any exceptions granted for connections for essential services.

Section 5: Transfers of Ownership – Identifies any transfers of ownership interest, operation, management, or other control of the treatment works, or any portion thereof.

Section 6: Compliance and Non-Compliance with the Consent Decree – Describes the status of compliance or non-compliance with requirements of the Consent Decree.

Section 7: SSOs, Bypasses, Diversions, and Effluent Limit Violations – Provides a spreadsheet and summary of all SSOs, Bypasses, Diversions, and effluent limit violations.

Section 8: Water Quality Monitoring Data – Summarizes all sampling that was conducted, the results of the sampling, and the projected data collection for the third quarter of 2006.

Status of Deliverables

Below is a list of significant dates on which KUB submitted deliverables to EPA or received approval for deliverables. To date, KUB has submitted all deliverables in accordance with the schedule set forth in the Consent Decree.

April 7, 2006

- Approved by EPA – Capacity Assurance Program

April 26, 2006

- Submitted to EPA – 2001-2005 SSOER Annual Update

April 27, 2006

- Submitted to EPA – Quarterly Progress Report 1st quarter 2006

May 22, 2006

- Re-submitted to EPA – Phase I Corrective Action Plan / Engineering Report (Phase I CAP/ER)

June 16, 2006

- Approved by EPA – Sanitary Sewer Overflow Evaluation Report (SSOER) Annual Update

June 30, 2006

- Approved by EPA – Phase I Correction Action Plan / Engineering Report (Phase I CAP/ER)

Section 1 Phase 1 CAP/ER and Phase 2 CAP/ER

Consent Decree language, pages 82-83: *"Each Quarterly Progress Report shall contain... A summary of compliance with and activities related to implementation of the Phase 1 CAP/ER and Phase 2 CAP/ER, including the status of construction projects in comparison to the schedules that have been established pursuant to the Consent Decree for those projects; and schedule deadlines and milestones achieved during Calendar Quarter and expected during next Calendar Quarter."*

KUB began developing a Corrective Action Plan/Engineering Report (CAP/ER) in January 2004, following the completion of the Phase I Sanitary Sewer Overflow Evaluation Report (SSOER) required by the Agreed Order with the Tennessee Department of Environment and Conservation (TDEC) and, subsequently, the Consent Decree. The objective of the Phase I CAP/ER is to identify facility improvements needed to address the conditions causing SSOs occurring in the collection system during the period of 2001-2004 with the goal of eliminating the SSO locations on the Long-Term List and to support future growth needs. KUB submitted the Phase 1 CAP/ER to EPA on October 28, 2005. Comments were received from EPA on February 23, 2006. Per EPA's letter, KUB submitted a 30-day response to EPA's comments on March 27, 2006. The Revised Phase 1 CAP/ER was submitted to EPA on May 22, 2006 and subsequently approved by EPA on June 30, 2006. All work necessary to meet the objectives of the Phase 1 CAP/ER will be completed by June 30, 2013. The Phase 2 CAP/ER will be submitted to EPA within 12 months after EPA approval of the SSOER Annual Update submitted on April 30, 2008.

Current Capital Improvement Plan for FY 04/05 and FY 05/06

The following is a list of facility improvement projects included in the Capital Improvement Plan for FY 04/05 (July 1, 2004, to June 30, 2005) and FY 05/06 (July 1, 2005, to June 30, 2006). These projects were in various stages during the reporting period including preliminary engineering, design, construction, and completion. Many of these projects are "find and fix" rehabilitation projects. Find work is defined as the inspection (i.e. flow monitoring, CCTV, manhole inspections, smoke testing, etc.) and design phase of the project. Fix is defined as the construction phase that may include manhole rehabilitation/replacement, main line rehabilitation/replacement, and lower lateral rehabilitation/replacement. Other projects are trunkline capacity improvements or wet-weather storage. Each of these projects is considered part of the overall Phase 1 CAP/ER.

Ongoing Projects

First Creek

1. **First Creek 8A1** - Find and design rehabilitation projects in First Creek sewer basin in the North Knoxville area around North Broadway and I-640. Project includes inspection (CCTV, smoke test, manhole inspections), design, rehabilitation of 21,067 lf, and replace 10,273 lf of sewer. Construction of this project is underway and is expected to be complete in December 2006.

2. **Upper First Creek Storage** - Design 9 million gallon (MG) wet-weather storage tank to control sewer overflows near Old Broadway during rain events. Construction is underway and completion is expected in April 2007.
3. **Lower First Creek Storage** - Design 5 MG wet-weather storage tank to control sewer overflows near North Hoitt Avenue during rain events. Construction is underway and completion is expected in November 2006.
4. **Fountain City Trunkline Replacement** - Replace and upgrade approximately 6000 lf of trunk sewer connecting lines in upper Fountain City to Upper First Creek storage tank. The project will address SSOs along Broadway, Cedar Lane, and Fountain Road. Preliminary design is complete. Design and easement acquisition are underway. Construction is expected to begin in Fall 2006 and is expected to be complete in Fall 2007.
5. **Sub-Basin 8B2** – Characterize the condition of 24,900 lf of pipe to determine rehabilitation needs. Condition Assessment and preliminary design is underway.

Second Creek

1. **Second Creek Sub-basin 15 Rehabilitation** - Rehabilitate approximately 23,500 lf of pipe in mini-basin 15D2. Project includes inspection (CCTV, smoke test, manhole inspections), design, and rehabilitation of lines requiring repair. Construction is substantially complete. Final clean up is underway.
2. **Second Creek 23E1** - Find and design rehabilitation needs for mini-basin 23E1. A total of 28,067 lf of pipe is to be inspected. Project includes inspection (CCTV, smoke test, manhole inspections), design, and rehabilitation of lines requiring repair. Construction is underway and completion is expected by October 2006.
3. **Dutch Valley Collector Rehab (Mini-basin 10B1)** – Assess and rehabilitate, where needed, approximately 16,400 lf of collector pipe. Condition Assessment design is complete. Construction is expected to begin in October 2006.
4. **Rickard and Wilson Collector Rehab (Mini-basin 10C1)** – Assess and rehabilitate, where needed, approximately 19,000 lf of collector pipe. Condition Assessment design is complete. Construction is expected to begin in October 2006.

Third Creek

1. **Third Creek Storage** - Design 4.5 MG wet-weather storage tank to control sewer overflows near Western Avenue and Third Creek Road during rain events. Preliminary design is complete. Site selection is complete and will be located at KUB's Hoskins Center. Construction is scheduled to begin in October 2006.
2. **Third Creek 28B1*** - Find and design rehabilitation needs for collectors in mini-basin 28B1 (approximately 7,900 lf of pipe). Project includes inspection (CCTV, smoke test, manhole inspections), design, and rehabilitation of lines requiring repair. The initial condition assessment and preliminary design analysis is complete. Plans are being developed for a future rehabilitation project. No construction is planned in the short-term.
3. **Third Creek Basin 11** - Find and design rehabilitation needs for collectors in sub-basin 11 (approximately 129,657 lf). Project includes inspection (CCTV, smoke test, manhole inspections), design, and rehabilitation of lines requiring repair. Construction is scheduled to begin in FY 07/08.
4. **Third Creek Basin 9** - Find and design rehabilitation methods for collectors in sub-basin 9 (approximately 177,900 lf). Project includes inspection (CCTV, smoke test, manhole

inspections), design, and rehabilitation of lines requiring repair. Phase I and II RFP process is complete. Phase I and II construction is on track to begin in summer 2006.

5. **Third Creek Road Trunk Sewer Replacement** – Project includes approximately 3100 lf of 24 inch and 30 inch trunkline. The project will replace and upgrade the trunkline from Western Avenue along Third Creek to the proposed Third Creek storage facility. It will address overflows occurring at 5600 Western Avenue. Design is underway. Project has been extended approximately 2000 lf to reach the new location of the Third Creek Storage Facility to be located at the KUB Hoskins Center. Construction services will be procured in Fall 2006.
6. **Upper McKamey Trunk Sewer Replacement** – Project will replace approximately 1600 lf of 12 inch and 15 inch trunk sewer. This project will further enhance improvements already made in Third Creek to address overflows along McKamey Road. Design is underway.

Fourth Creek

1. **Papermill Drive Phases I, II, and III** - Design and construct replacement of approximately 4,000 lf of 15-inch and 18-inch sewer in the Papermill Drive area to increase conveyance capacity and reduce sewer overflows. Phases I & III are complete, Phase II is underway. The entire project will be complete in January 2007.
2. **Walker Springs Rehabilitation (Mini-Basin 32A4)** - Perform, find, and design work in mini-basin 32A4 in the Walker Springs area. Inspection includes 43,000 lf of smoke testing, 43,000 lf of CCTV, and 228 manhole inspections. Plans will be developed for future rehabilitation work. Condition Assessment and preliminary design is complete.
3. **Walker Springs Storage** - Design and begin construction on 3.6 MG wet-weather storage tank to control sewer overflows near Walker Springs Pump Station during rain events. Construction is underway. Project is on track to reach substantial completion in August 2006.

South Knox

1. **Ginnbrook Pump Station** – Project will include evaluation of pump station and force main to ensure adequate capacity. Project will also include improvements to wet-well, pump system, and valve vault. Design is underway.
2. **Blount Avenue Trunkline** – Project will examine major trunkline along Blount Avenue in South Knoxville. Project will include field survey, line cleaning, and CCTV inspection. Design report has been prepared and presents recommendation on needed improvements. Construction schedule is being evaluated.

*The project named Third Creek 28B1 replaces Third Creek 28C1 that appeared in the Quarterly Progress Report for the Second Quarter 2005. After additional studies, it was determined that flows from 28B1 more likely contributed to overflows along Sutherland Avenue and North Bellemeade, as listed in the SSOER.

Completed Projects

First Creek

1. **Fountain Road** - Upsize 3,700 linear feet (lf) of gravity sewer using open cut and pipe bursting methods. Replace manholes and services.
2. **Fair Drive Phase II** - Rehabilitate 3691 lf and replace 2458 lf of existing 8-12 inch gravity sewer along Fair Drive.
3. **Greenfield Lane** - Replace approximately 3,300 lf of existing sewer with 8-inch and 12-inch PVC and ductile iron pipe.
4. **Whites Creek Phase III** - Replace 300 lf of 12-inch, 300 lf of 16-inch, 2,700 lf of 24-inch, and 5,000 lf of 36-inch sewer.
5. **First Creek Sub-basins 3 and 4 Rehabilitation** - Find and fix rehabilitation in First Creek sewer basin in the Fountain City area (mini-basins 03B1, 03B2, and 04B2). Project includes inspection (CCTV, smoke test, manhole inspections), design, rehabilitation of 26,500 lf of lines requiring repair, and replace 10,500 lf of sewer.

Second Creek

1. **Second Creek Pilleaux PS Collector** - Rehabilitate 19,600 lf of collection system piping in mini-basin 05A4. Project includes inspection (CCTV, smoke test, manhole inspections), design, and rehabilitation of lines requiring repair.

Third Creek

1. **Mynderse, Western, and Canna** - Replace approximately 1,700 lf of 8-inch sewer and pipe-burst approximately 3,400 lf of 8-inch up to 10-inch and 12-inch pipe to address wet-weather capacity restrictions resulting in overflows near Pleasant Ridge Road.

Fourth Creek

1. **Pinebrook Drive Sewer Replacement** - Design and construct replacement of 330 lf of 8-inch gravity sewer partially exposed by erosion of the bank of the adjacent drainage channel.

South Knox

1. **Maryville Pike** - Design and construct replacement of 800–1,200 lf of 24-inch sewer located in Witherspoon Superfund site. Design will reroute sewer around site
2. **South Haven Phase I and Phase II** - Relocate, rehabilitate, and upsize approximately 4,700 lf of existing collector sewers to increase conveyance capacity and reduce I/I.
3. **Island Home Rehabilitation** - Rehabilitate 9,400 lf and replace 1,200 lf of collector sewers to reduce I/I.
4. **East Ford Valley Rehabilitation** - Rehabilitate approximately 16,000 lf of sewers in mini-basin 41A4. Project includes inspection (CCTV, smoke test, manhole inspections), design, and rehabilitation of lines requiring repair.
5. **Stone Road Rehabilitation** - Rehabilitate approximately 13,500 lf of sewers in mini-basin 41B1. Project includes inspection (CCTV, smoke test, manhole inspections), design, and rehabilitation of lines requiring repair.
6. **South Haven Rehabilitation Phase III** – Rehabilitate approximately 21,700 lf of sewers in mini-basin 40F1. Project includes inspection (CCTV, smoke test, manhole inspections), design, and rehabilitation of lines requiring repair.

Williams Creek

1. **Delrose Force Main Replacement** - Design and construct replacement of approximately 5,000 lf of 16-inch ductile iron pipe force main that has severe structural problems.
2. **Williams Creek Trunk Line Replacement** – Design and construct replacement of approximately 3,700 lf of 24-inch sewer to correct structural problems.

Section 2 Comprehensive Performance Evaluation Program (CPE) and Composite Correction Plan (CCP)

Consent Decree language, pages 82-83: *"Each Quarterly Progress Report shall contain... A summary of compliance with and activities related to implementation of the CPE and CCP."*

The CPE includes short-term actions and CCP elements. The short-term actions will be addressed once the CPE is approved. The CCP elements, which include rehabilitation and/or upgrades to the Kuwahee, Fourth Creek, and possibly to Loves Creek WWTPs, will be addressed in the CCP following the approval of the CPE.

The CPE was submitted to EPA on February 24, 2006. KUB met with EPA and TDEC officials on June 21, 2006 to discuss the CPE.

Section 3 Process Controls Program

Consent Decree language, pages 82-83: *"Each Quarterly Progress Report shall contain... A summary of implementation of and compliance with the Process Controls Program."*

The Process Controls Program (PCP) was utilized six times during this reporting period. All parameters were followed and diversions were based on PCP parameters.

KUB and CDM representatives continue to evaluate the PCP. Multiple events have been analyzed by examining the MLSS trending and associated flows during PCP-controlled diversions. The PCP was originally scheduled for revision in September 2006. However, discussion with the EPA official on Wednesday June 21, 2006 focused on the need to extend the PCP evaluation period. Additional time is needed due to the limited number of wet weather events that have occurred since implementing the PCP. KUB desires to test the program under a wider range of wet weather conditions and a larger number of events. It was agreed that KUB will submit a letter report to the EPA by the end of September 2006 documenting some limited observations to date, and the need to extend the PCP evaluation period.

Section 4 Capacity Assurance Program

Consent Decree language, pages 82-83: *"Each Quarterly Progress Report shall contain... A summary of the implementation of the Capacity Assurance Program for that Calendar Quarter, including the number of, and anticipated flow from, sewer connections that have been authorized, by Sewerbasin, a description of the projects that have been authorized and the number of credits earned and banked by KUB that will be expended for those projects, by Sewerbasin, and any exceptions granted for connections for essential services."*

The Capacity Assurance Program (CAP) was submitted to EPA for review on February 8, 2006. EPA reviewed and approved the program on April 7, 2006. KUB started reviewing building permits based on the approved CAP on June 6, 2006, which was within the 60-day timeframe for implementing the program once KUB received approval from the EPA.

In order to review building permits more efficiently using the CAP criteria, agreed upon with the EPA, KUB worked with a consultant, Camp, Dresser and McKee, to develop an Information Management System (IMS). The IMS system assists KUB in managing the CAP program by determining the amount of wastewater each proposed building permit will add to KUB's wastewater system based on the location of the proposed building. The IMS system also helps track the rehabilitation credits that KUB earns through its CAP/ER and MOM programs.

Appendix A contains a list of all new building permits that have applied for wastewater service in KUB's system from April 2005 until June 30, 2006. Please note that the TDEC CAP criteria were used to review all building permits until June 6, 2006. The EPA CAP criteria were used to review building permits from June 6 to June 30, 2006. Appendix A also includes a list of capital projects that KUB performed to gain rehabilitation credit in its sewer system.

Section 5 Transfers of Ownership

Consent Decree language, pages 82-83: *"Each Quarterly Progress Report shall contain... Identification of any transfer of an ownership interest, operation, management, or other control of the Treatment Works, or any portion thereof."*

There has been no transfer of an ownership interest, operation, management, or other control of the Treatment Works, or any portion thereof, during this reporting period.

Section 6 Compliance and Non-Compliance With the Consent Decree

Consent Decree language, pages 82-83: *"Each Quarterly Progress Report shall contain...A description of the status of compliance or non-compliance with the requirements of this Decree and, if applicable, the reasons for non-compliance, including a list of all violations that are subject to stipulated penalties under Section X of this Consent Decree."*

6.1 Submission of Deliverables

To date, KUB has submitted all deliverables in accordance with the schedule set forth in the Consent Decree. The following sections detail all activity related to deliverables that occurred during the past quarter. Also noted are the dates each submittal was available for public comment in the Public Document Repository (PDR), when the deliverable was submitted to EPA, when EPA responded with comments, when KUB responded to those comments, and when EPA approval was received.

6.1.1 Capacity Assurance Program

Consent Decree language, page 30: *"No later than three-hundred and sixty-five (365) Days after the Date of Entry, KUB shall submit an Capacity Assurance Program."*

KUB placed the Capacity Assurance Program in the PDR on December 16, 2005. This Review Level 1 Deliverable was available for public comment from December 16, 2005, until January 16, 2006. No comments were received during that period. KUB submitted this deliverable on February 8, 2006, and EPA subsequently approved it on April 7, 2006.

6.1.2 Phase 1 Corrective Action Plan/Engineering Report

Consent Decree language, page 23: *"On or before November 1, 2005, KUB shall submit a Phase 1 Corrective Action Plan/Engineering Report ("Phase 1 CAP/ER") to address the conditions causing SSOs with the goal of eliminating the SSO locations on the Long-Term List."*

KUB placed the Phase 1 Corrective Action Plan/Engineering Report in the PDR on September 12, 2005. This Review Level 1 Deliverable was available for public comment from September 12, 2005, until October 12, 2005. No comments were received during that period. KUB submitted this deliverable on October 28, 2005. This deliverable was disapproved by EPA on February 23, 2006. On March 13, 2006, KUB met with EPA and TDEC regarding comments that were received in the disapproval letter. On March 27, 2006, KUB submitted the 30-day response to EPA's comments per the disapproval letter. The revised deliverable was submitted to EPA on May 22, 2006, and was subsequently approved by EPA on June 30, 2006.

6.1.3 Comprehensive Performance Evaluation Program

Consent Decree language, page 41: *"The full CPE shall be submitted to EPA within three-hundred (300) Days of EPA's approval of the initial scope."*

KUB placed the Comprehensive Performance Evaluation Program in the PDR on January 13, 2006. This Review Level 1 Deliverable was available for public comment from January 13, 2006, until February 13, 2006. No comments were received during that period. KUB submitted this deliverable on February 24, 2006. KUB met with EPA and TDEC officials on June 21, 2006 to discuss the CPE.

6.1.4 2001-2005 Sanitary Sewer Overflow Evaluation Report Annual Update

Consent Decree language, page 21: *"Beginning on April 30, 2005, and on an annual basis thereafter, until termination of this Consent Decree, KUB shall submit an update to the SSOER to address those conditions that caused the SSOs that occurred during the previous Calendar Year, in accordance with subparagraphs (b) through (e) below ("Annual SSOER Update")."*

On April 26, 2006, KUB submitted to EPA and placed in the PDR the 2001-2005 Sanitary Sewer Overflow Evaluation Report Annual Update. This Review Level 1 Deliverable was available for public comment from April 26, 2006 until May 16, 2006. No comments were received during that period. EPA approved the deliverable on June 16, 2006.

6.1.5 Quarterly Progress Report First Quarter 2006

Consent Decree language, pages 82-83: *"Beginning thirty (30) Days after the first Calendar Quarter following the Date of Entry, and thirty (30) Days after each Calendar Quarter thereafter until termination of the Consent Decree, KUB shall submit to the Parties, and simultaneously place in the PDR, a Quarterly Progress Report."*

On April 27, 2006, KUB submitted to EPA and placed in the PDR the Quarterly Progress Report for the first quarter 2006. This deliverable was not subject to the Public Review Requirement of Section VI.A.2, but was available for public comment from April 27, 2006, until May 17, 2006. No comments were received during that period.

6.2 Violations Subject to Stipulated Penalties

During this reporting period, KUB incurred eighteen Unpermitted Discharges. Two of those events were due to blockages caused by grease, thirteen were due to heavy rainfall, and three were due to broken pipe. The unpermitted discharge at 2201 Cumberland Avenue was caused by a dry weather blockage that occurred during a rainfall event. Storm drains were flowing during this event due to the rainfall and samples were not taken. Table 1 below lists all violations subject to stipulated penalties as outlined in the Consent Decree.

Table 1. Violations Subject to Stipulated Penalties

Violation	Date	Address	Cause
Unpermitted Discharge	4/04/06	5105 Ball Road	Construction – broken pipe
Unpermitted Discharge	4/08/06	4713 Old Broadway	Heavy rainfall
Unpermitted Discharge	4/08/06	2900 Rennoc Road	Heavy rainfall
Unpermitted Discharge	4/08/06	1422 Hoitt Avenue	Heavy rainfall
Unpermitted Discharge	4/08/06	436 Maryville Pike	Heavy rainfall
Unpermitted Discharge	4/08/06	3001 Shelbourne Road	Heavy rainfall
Unpermitted Discharge	4/08/06	600 N. Gallaher View Road	Heavy rainfall
Unpermitted Discharge	4/22/06	4713 Old Broadway	Heavy rainfall
Unpermitted Discharge	4/22/06	436 Maryville Pike	Heavy rainfall
Unpermitted Discharge	4/22/06	3001 Shelbourne Road	Heavy rainfall
Unpermitted Discharge	4/22/06	1422 Hoitt Avenue	Heavy rainfall
Unpermitted Discharge	4/24/06	2900 Rennoc Road	Heavy rainfall
Unpermitted Discharge	4/24/06	600 N. Gallaher View Road	Heavy rainfall
Unpermitted Discharge	4/24/06	5000 Western Avenue	Heavy rainfall
Unpermitted Discharge	5/05/06	2201 Cumberland Avenue	Construction – broken pipe
Unpermitted Discharge	5/11/06	4605 Central Avenue Pike	Blockage - Grease
Unpermitted Discharge	5/22/06	4322 Anderson Road	Construction – broken pipe
Unpermitted Discharge	6/27/06	2429 Selma Avenue	Blockage - Grease

Section 7 SSOs, Bypasses, Diversions, and Effluent Limit Violations

Consent Decree language, pages 82-83: *"Each Quarterly Progress Report shall contain... A spreadsheet and summary of all SSOs, Bypasses, Diversions, and effluent limit violations that occurred during the previous Calendar Quarter. Information on Building Backups may be provided in separate spreadsheets and summaries from other SSOs. The spreadsheets and summaries shall identify:*

- a. For all SSOs, the location, source, date, time, duration, pathway (if any), receiving water (if any), the reason for each SSO, the total SSO volume, the volume returned to the WCTS, and the volume not captured;*
- b. For all Bypasses and Diversions, the location, date, time, duration, volume and reason for each Bypass and Diversion; and the total Bypass or Diversion volumes;*
- c. For all effluent limit violations, all information required to be reported on KUB's Discharge Monitoring Reports."*

7.1 SSOs

Appendix B lists all SSOs that occurred during this reporting period. During this period, there were 35 SSO events. Of that number, 14 were due to blockages by either grease, debris, roots, or a combination thereof, 15 were due to heavy rainfall, five were due to broken pipe, and one was due to a pump station electrical failure. Of the 35 SSO events, 23 were in the 0 – 1000 gallons volume range, four were in the 1001 – 10,000 range, and eight events totaled greater than 10,000 gallons. Durations for events during this period are as follows: 17 ranged from 0 – 2 hours, seven ranged from 2.1 – 5 hours, and eleven lasted more than five hours.

One event could be considered significant because of the significant volume. This event occurred due to the failure of a twelve-inch force main. The secluded location, prevented the overflow from being readily apparent, resulting in the loss of significant volume.

7.2 Building Backups

Appendix C lists all Building Backups that occurred during this reporting period. During this period, there were six Building Backups. Causes for these events are as follows: one was due to blockage, two were due to vandalism, and three occurred due to flushing operations.

7.3 Bypasses

No Bypasses occurred during this reporting period.

7.4 Diversions

Six Diversion events occurred during this reporting period (Table 2); four at Kuwahee WWTP (impacting six reporting days) and two at Fourth Creek WWTP (impacting four reporting days). All were attributed to a high flow event resulting from excess rainfall. No Diversions occurred at Loves Creek WWTP during this period. Eastbridge WWTP does not bypass or divert flows. The total Diversion volume for the reporting period was 59.00 MG.

7.5 Effluent Limit Violations

Table 3 contains all effluent limit violations that occurred during this reporting period. The table contains the information as it is reported in KUB's Discharge Monitoring Reports. During this reporting period, three effluent limit violations occurred at Kuwahee WWTP and three at Fourth Creek WWTP. Two of the violations at Kuwahee were of total suspended solids. The third violation at Kuwahee was of settleable solids. The three violations at Fourth Creek were of fecal coliform. No effluent limit violations occurred at Loves Creek WWTP during the reporting period.

Table 2: Bypasses and Diversions

WWTP	Did an event occur?	Type of Event	Date Diversion gate opened	Time Diversion gate opened	Date Diversion gate closed	Time Diversion gate closed	Date Diversion flow reported	Duration (hrs)	Volume (MG)	Total Event Duration (MG)	Total Event Volume (MG)	Reason for Event
Kuwahee	Yes	Diversion	04/03/2006	04:30			04/02/2006	2.5	4.46	7.5	11.08	High flow event due to excess rainfall
					04/03/2006	12:00	04/03/2006	5	6.62			
Kuwahee	Yes	Diversion	04/08/2006	03:00			04/07/2006	4	4.62	18.5	9.33	High flow event due to excess rainfall
					04/08/2006	21:30	04/08/2006	14.5	4.71			
Kuwahee	Yes	Diversion	04/21/2006	12:00	04/21/2006	16:30	04/21/2006	4.5	4.93	4.5	4.93	High flow event due to excess rainfall
Kuwahee	Yes	Diversion	04/22/2006	00:30			04/21/2006	6.5	13.54	17.5	27.81	High flow event due to excess rainfall
					04/22/2006	18:00	04/22/2006	11	14.27			
Fourth Creek	Yes	Diversion	04/08/2006	05:30			04/07/2006	1.5	.45	11	2.62	High flow event due to excess rainfall
					04/08/2006	16:30	04/08/2006	9.5	2.17			
Fourth Creek	Yes	Diversion	04/22/2006	00:30			04/21/2006	6.5	1.46	16.25	3.23	High flow event due to excess rainfall
					04/22/2006	16:45	04/22/2006	9.75	1.77			
Loves Creek	No											
Eastbridge	No											

There were two diversion gate operations on the reporting day 4/21/2006. The diverted flow totals and times were combined for the reporting day and reported on 4/21/2006. The second event during the 4/21/2006 reporting day began at 00:30 on 4/22/2006. The diverted flow totals and times between 00:30 and 07:00 were reported on 4/21/2006. The diverted flow totals and times between 07:00 and 18:00 on 4/22/2006 were reported on the 4/22/2006 reporting day.

Table 3: Effluent Limit Violations

WWTP	Did an event occur?	Date	Parameter	Type	Limit	Value
Kuwahee	Yes	04/03/2006	TSS	Daily Max	45 mg/l	66 mg/l
Kuwahee	Yes	04/03/2006	SS	Daily Max	1 ml/l	2.2 ml/l
Kuwahee	Yes	04/22/2006	TSS	Daily Max	45 mg/l	46 mg/l
Fourth Creek	Yes	05/06/2006	FECAL	Daily Max	1000 cfu	1200 cfu
Fourth Creek	Yes	05/07/2006	FECAL	Daily Max	1000 cfu	1400 cfu
Fourth Creek	Yes	05/18/2006	FECAL	Daily Max	1000 cfu	1900 cfu
Loves Creek	No	-	-	-	-	-
Eastbridge	No	-	-	-	-	-
Ritta School	No	-	-	-	-	-
SS - Settleable Solids	mg/l - milligrams per liter					
TSS - Total Suspended Solids	cfu - Colony Forming Unit					
ml/l - milliliters per liter	lbs - Pounds

Section 8 Water Quality Monitoring Data

Consent Decree language, pages 82-83: *"Each Quarterly Progress Report shall contain... The water quality monitoring data and other information required pursuant to Section VII.D.1.(e).(v)."*

8.1 Sampling Conducted and Results

Appendix D lists all sampling that was conducted during the reporting period and the results thereof. KUB began Dry Weather Investigative Monitoring for Williams Creek in March and reported preliminary data in the 1st quarter 2006 report. Additional dry weather sampling along Williams Creek was conducted during this quarter to further investigate the location of the source producing the high counts in one area of the stream. Also, investigative sampling along one tributary entering Williams Creek was performed after a customer observed a dead fish and frog in the tributary. Further investigation revealed a contamination source from a recent SSO upstream of the tributary on Selma Avenue. After cleanup, spill sampling indicated that counts in the tributary returned to low levels. The spill monitoring data has been included with this quarterly report. Additional samples were also collected on three different days of dry weather in the segment of the creek under investigation. A review of televised sewer line data and smoke testing has not revealed any other significant sewer issues that would contribute to the slightly elevated counts observed in one area of Williams Creek. Samples were collected for polymerase chain reaction (PCR) and fecal strep analyses on 6/22/06 to further investigate the origin of the high bacteria concentrations. Some of these results are still pending. Wet weather monitoring along Williams Creek is scheduled to be completed as soon as weather conditions produce a significant rainfall. This investigative information and the source testing data (PCR) will allow completion of the Williams Creek Investigative report for the next Quarterly Progress Report. KUB also investigated segments of two other streams this quarter. A segment of Second Creek was examined after a water quality call from the City of Knoxville, but results indicated that the stream was not impacted at the time of concern. Additional investigation and inspection after another call further upstream revealed a lateral from a nearby area business was not properly tied to the sanitary sewer. This problem has been corrected and may have been responsible for sporadic high counts in Second Creek obtained during some routine monitoring. Elevated counts were also observed during the routine monitoring of Fourth Creek during this quarter around Site 0.55. Some location of source testing has already been performed, which confirmed an area near an incoming tributary needs further evaluation.

All available lab results on samples collected during this quarter are included in Appendix D.

8.2 Projected Data Collection

During the third quarter of 2006, KUB will continue to monitor the 24 routine sampling locations in the sewer basins of eight area creeks. KUB will collect samples from the following locations during the third quarter 2006:

Sample Locations by Creek Mile or Site Number

<i>Creek Name</i>	<i>Creek Mile #</i>	<i>Creek Mile #</i>	<i>Creek Mile #</i>
First Creek	0.45	2.57	6.33
Second Creek	0.36	1.54	5.76
Third Creek	0.87	2.08E	4.80W
Fourth Creek	0.55	1.33	1.78
Baker Creek	0.15	0.32	0.36S
Goose Creek	0.35	0.90E	1.50E
Loves Creek	0.85	1.89	3.45
Williams Creek	0.53	1.12	1.67

KUB will continue to implement the investigative monitoring component to determine whether the pollution is related to sewer or non-sewer sources. Additional investigative sampling and walking surveys are planned for Bakers Creek and Second Creek during the third quarter of 2006.

Appendix A

0002146

*Status: I = Site Under Investigation, R = Reportable for monitoring purposes
Precipitation event = "Wet" if the total amount of rainfall for four days prior to the sample was greater than 0.1 inches.

Spill Impact Sampling Results **Water Quality Monitoring Program**

Event Date: 04-04-06
Address: 5105 Ball Road
Description: Failure in the force main from near Ball Camp Road Pump Station. SSO discharged to Grassy Creek.
Estimated unrecovered volume 420,000 gallons
Sampling Notes: There was no industry upstream of the SSO, therefore no Priority Pollutant samples were collected.

Precipitation: 4-04-06: 0.00 inches rain

Sample Location	Sample Date	Sample Time	Dissolved Oxygen (mg/l)	Temperature (Celsius)	pH	Fecal Coliform (CFU/100ml)	E-Coli (MPN)
Uptream of SSO discharge #1	04-04-06	13:35	6.5	13	7.4	280	470
Uptream of SSO discharge #2	04-04-06	13:50	6.6	16	7.4	160	120
Downstream of SSO discharge	04-04-06	13:03	6.4	14	6.8	360	740

Spill Impact Sampling Results Water Quality Monitoring Program

Event Date: 04-08-06
Address: 3001 Shelbourne Road
Description: Rainfall in the area produced I & I and high flows in the sewer mains in previous days. SSO discharged to a catch basin that lead to Loves Creek.
Estimated unrecovered volume 38 gallons
Sampling Notes: There was no industry upstream of the SSO, therefore no Priority Pollutant samples were collected.
Precipitation: 4-07-06: 1.2 inches rain
 4-09-06: 0.3 inches rain
 4-09-06: 0.0 inches rain

Sample Location	Sample Date	Sample Time	Dissolved Oxygen (mg/l)	Temperature (Celsius)	pH	Fecal Coliform (CFU/100ml)	E-Coli (MPN)
Upstream of SSO discharge	04-09-06	10:00	12	13	7.3	1000	1300
Downstream of SSO discharge	04-09-06	11:21	10	12	8.8	360	690

Spill Impact Sampling Results Water Quality Monitoring Program

Event Date:

Address:

Description:

Estimated unrecovered volume

Sampling Notes:

Precipitation:

04-22-06

410/436 Maryville Pike

Rainfall in the area produced 1 & 1 and high flows in the sewer mains in previous day. SSO discharged to an unnamed tributary to Goose Creek.

26,600 gallons

There was no industry upstream of the SSO, therefore no Priority Pollutant samples were collected.

04-21-06: 2.2 inches rain

04-22-06: 0.0 inches rain

Sample Location	Sample Date	Sample Time	Dissolved Oxygen (mg/l)	Temperature (Celsius)	pH	Fecal Coliform (CFU/100ml)	E-Coli (MPN)
Upstream of SSO discharge	04-23-06	08:40	8.3	15	7.3	2100	>2400
Downstream of SSO discharge	04-23-06	08:57	8.2	15	7.6	3400	>2400

Downstream of SSO discharge	04-24-06	12:07	8.5	17	8.6	550	1200

0002149

Spill Impact Sampling Results Water Quality Monitoring Program

Event Date:

Address:

Description:

Estimated unrecovered volume

Sampling Notes:

Precipitation:

04-22-06

1422 Hoitt Avenue -initially reported as 1600 N. Fourth Avenue

Rainfall in the area produced 1 & 1 and high flows in the sewer mains in previous day. SSO discharged to a ditch to First Creek.

1438 gallons

There was no industry upstream of the SSO, therefore no Priority Pollutant samples were collected.

04-21-06: 2.2 inches rain

04-22-06: 0.0 inches rain

Sample Location	Sample Date	Sample Time	Dissolved Oxygen (mg/l)	Temperature (Celsius)	pH	Fecal Coliform (CFU/100ml)	E-Coli (MPN)
Upstream of SSO discharge	04-23-06	09:30	8.9	16	7.7	2500	2400
Downstream of SSO discharge	04-23-06	09:35	8.9	16	7.5	1700	2000

0002150

Spill Impact Sampling Results Water Quality Monitoring Program

Event Date: 04-24-06
Address: 2900 Rennoc Road
Description: Rainfall in the area produced 1 & 1 and high flows in the sewer mains in previous days. SSO discharged to soil saturation and an unnamed tributary to First Creek.
Estimated unrecovered volume 322 gallons
Sampling Notes: There was no industry upstream of the SSO, therefore no Priority Pollutant samples were collected.
Precipitation: 04-21-06: 2.2 inches rain
 04-22-06: 0.0 inches rain
 04-23-06: 0.0 inches rain
 04-24-06: 0.0 inches rain

Sample Location	Sample Date	Sample Time	Dissolved Oxygen (mg/l)	Temperature (Celsius)	pH	Fecal Coliform (CFU/100ml)	E-Coli (MPN)
Upstream of SSO discharge	04-24-06	13:57	7.6	22	7.4	380	690
Downstream of SSO discharge	04-24-06	14:10	7.7	20	7.3	460	650

Spill Impact Sampling Results Water Quality Monitoring Program

Event Date: 05-11-06
Address: 4605 Central Avenue
Description: SSO was caused by grease blockage and discharged to a storm drain that lead to Second Creek.
Estimated unrecovered volume 36 gallons
Sampling Notes: There was no industry upstream of the SSO, therefore no Priority Pollutant samples were collected.
Precipitation: 05-10-06: 0.1 inches rain
05-11-06: 0.1 inches rain

Sample Location	Sample Date	Sample Time	Dissolved Oxygen (mg/l)	Temperature (Celsius)	pH	Fecal Coliform (CFU/100ml)	E-Coli (MPN)
Upstream of SSO discharge	05-11-06	19:42	7.2	17	7.3	210	99
Downstream of SSO discharge	05-11-06	19:30	7.0	20	7.4	1000	960
Upstream of SSO discharge	05-15-06	09:32	8.0	16	7.7	40	40
Downstream of SSO discharge	05-15-06	09:52	8.4	16	7.7	54	44

Spill Impact Sampling Results Water Quality Monitoring Program

Event Date:

05-22-06

Address:

4322 Anderson Road

Description:

SSO was caused by partial blockage in the sewer main caused by a broken main. Discharged to a soil saturation and Whites Creek.

Estimated unrecovered volume

2517 gallons

Sampling Notes:

There was no categorical industry upstream of the SSO, therefore no Priority Pollutant samples were collected.

Precipitation:

05-22-06: 0.0 inches rain

Sample Location	Sample Date	Sample Time	Dissolved Oxygen (mg/l)	Temperature (Celsius)	pH	Fecal Coliform (CFU/100ml)	E-Coli (MPN)
Upstream of SSO discharge	05-22-06	15:31	9.3	18	7.8	330	1100
Downstream of SSO discharge	05-22-06	15:40	9.6	17	7.7	470	920
Upstream of SSO discharge	05-24-06	11:05	8.9	17	7.7	310	580
Downstream of SSO discharge	05-24-06	11:20	9.8	14	7.7	290	550

0002153

Spill Impact Sampling Results Water Quality Monitoring Program

Event Date: 06-27-06
Address: 2436 Selma Avenue
Description: SSO discharged to soil saturation and unnamed tributary into Williams Creek, caused by a blockage due to grease.
Estimated unrecovered volume 22,440 gallons
Sampling Notes: There was no industry upstream of the SSO, therefore no Priority Pollutant samples were collected.

Precipitation: 06-27-06: 0.00 inches rain

Sample Location	Sample Date	Sample Time	Dissolved Oxygen (mg/l)	Temperature (Celsius)	pH	Fecal Coliform (CFU/100ml)	E-Coli (MPN)
