Plant the Right Tree in the Right Place

KUB prunes trees to maintain safe, reliable electric service. Avoid future conflicts between trees and power lines by planting only low-growing trees near power lines, as shown.

If you have questions about tree pruning, visit www.kub.org/plantsmart. You can also call our Vegetation Management hotline at 865-558-6658 weekdays, 7 a.m.–9 p.m., or email trees@kub.org.

Remember: Always call 811 to have underground utilities marked for free before you dig for any project. (See above for more 811 information.)

Q&A

Q: Is it really okay to put “flushable” wipes in my toilet?
A: No. Despite marketing claims, it isn’t a good idea. KUB and utilities nationwide have seen evidence of harmful materials being put down drains more than ever, as utility customers spend more time at home. It is crucial to only flush human waste and toilet paper down your drains. Any other materials can clog your pipes or jam sewer pumps, leading to backups into homes, sewer overflows, and costly repairs - even if the product is marked as “flushable.”

Among items that should not be flushed are:
- Baby/personal hygiene wipes, feminine products, disposable toilet wand heads, paper towels, dental floss
- Cooking oils or grease; pour it in a can for disposal in the trash.
- Prescription/over-the-counter drugs; take these to collection events or the 24/7 collection site in the Knoxville Police Dept.

For more information, visit www.kub.org/toilets.

Call 811 Before You Dig

Call 811 at least three working days before you dig to have underground utilities marked for free. It’s the law, and it helps protect you from dangerous and costly dig-ins. KUB will mark all natural gas, water, and wastewater mains, underground electric primary lines, and natural gas service lines. KUB does not mark water service lines, sewer laterals, and underground electric service lines. For more information on natural gas safety, visit www.kub.org.
KUB Checks Natural Gas Safety
Natural gas is a safe, reliable, domestic fuel that has a variety of uses. KUB meets or exceeds the minimum federal safety standards through system maintenance, operations, safety surveys, and replacement programs.

When KUB responds to a potential natural gas leak call, we check natural gas lines (outside and inside), appliances, and appliance connections for leaks. If we find an immediate hazard inside, we shut off gas flow to the appliance or building and place a red tag on the appliance or meter with the unsafe condition(s) found.

KUB advises customers to contact a qualified HVAC, plumbing, or natural gas appliance contractor to have the condition(s) on the tag repaired. KUB follows up with a letter to Codes Enforcement and the property owner about the presence of unsafe conditions. After making repairs, customers must call 865-524-2911 to have KUB complete a free follow-up leak inspection and restore service for their safety.

KUB Offers Customer Rebates on EV Chargers, Natural Gas Appliances
KUB's EV Charger Rebate program offers residential electric customers a rebate of up to $400 toward a level 2 EV charger. To be eligible, applicants must provide a copy of the retail receipt for the electric vehicle charger and a photo of the newly installed charger.

Visit www.kub.org/ev for more details or to apply for a rebate.
KUB's Natural Gas Appliance Rebate program offers residential natural gas customers rebates on natural gas appliances varying in price by appliance. Customers who convert to a natural gas appliance (grill, stovetop/range, dryer, etc.) could be eligible for a rebate.

Visit www.kub.org/gas for more information.

Who Repairs Electric Service Lines?
KUB repairs its lines as quickly as possible after damage occurs, but sometimes, customer-owned equipment and facilities must be repaired before KUB can restore power.

KUB installs and repairs the service line (1) and electric meter (6).

The property owner must clear trees or limbs from the service line and repair any damage to the customer-owned service equipment. The service line is the line from KUB's pole to the customer's building. The customer-owned service equipment includes the service bracket (if it's on the side of the house) (2), weatherhead (3), service cables (inside weatherhead) (4), and meter socket (5).

*Note: If the service bracket is on a weatherhead that extends above the building's roof, KUB repairs it.

Reminder: Customers should contact a qualified electrician for repairs. KUB will lower the service line at no cost so the contractor can safely perform repairs. Afterward, call KUB at 865-524-2911 to start KUB repairs.

Self-Service Bill Payment Options
KUB offers various ways to pay your bill while maintaining appropriate social distance. KUB is currently waiving or reimbursing any transactional fees associated with these payment methods.

- **Automatic bank draft (AutoPay)** drafts your payment automatically from your bank when it is due.
