CCTV Inspections – Contractor crews will be performing closed-circuit TV (CCTV) inspections of wastewater pipes and manholes at various locations across the entire Phase 3 area for the duration of the project. Due to the location of some manholes in the roadway, this work will require temporary lane closures with flaggers present to maintain traffic flow. Crews will also need to access manholes and pipes located in off-road easements.

Restoration – Crews will work in recently excavated areas across the Phase 3 zone starting next week. Work in roadways will require short term lane/road closures.
