

# MAJOR PROJECT UPDATE

This project is being completed as part of KUB's Century II infrastructure improvement and replacement programs.

**PROJECT TITLE:** Sequoyah Hills Utility Projects

**UPDATE ISSUE DATE:** July 30, 2021

*Please see corresponding maps for work zones referenced below.*

## **UPDATE:**

Phase 3 area traffic impacts for week of August 2-6:

KUB contract crews will implement the below traffic control measures as indicated daily from 7 a.m. – 7 p.m., Monday, August 2, through Friday, August 6, as work continues on the wastewater collection system in the area:

- Intermittent lane closures
  - o Kenesaw Avenue between Cherokee Boulevard and Westerwood Avenue
  - o Keowee Avenue between Iskagna Drive and Talahi Drive
- Intermittent Road Closures
  - o Glenfield Drive between Scenic Drive and Oakhurst Drive
- Wastewater work in off-road easements
  - o Easement between Glenfield Drive and Dellwood Drive
  - o Easements between Iskagna Drive and Talahi Drive

Residential access will be maintained, and through traffic should follow the onsite detours. Follow-up advisories will be issued as necessary.

**East Hillvale Turn Water Main Replacement Project** – KUB will replace the water main along East Hillvale Turn between Kingston Pike and West Hillvale Turn. Pre-construction activities, including saw-cutting asphalt, started this past Wednesday. Excavation is scheduled to begin on Monday, July 23. **ROAD CLOSURE NOTICE:** As part of this work, KUB crews will implement month-long daily road closures on East Hillvale Turn from 6:30 a.m. – 4 p.m. starting on Wednesday, July 21, and lasting through Friday, August 20, weather permitting. Access to driveways will be maintained. Additionally, temporary water service interruptions may be needed as customer service lines are connected to the new water main. Customers in the area may also experience temporary low water pressure as the system returns to normal following construction.

# MAJOR PROJECT UPDATE

This project is being completed as part of KUB's Century II infrastructure improvement and replacement programs.

Trapped air in water lines may temporarily cause the water to appear cloudy. Letting the water run for a few minutes at a faucet will allow the water to clear. The temporary cloudy appearance poses no safety issues with the water and will not harm household plumbing systems.

**Woodland Court Water Main Replacement Project** – KUB will replace the water main along Woodland Court starting in early August. Pre-construction activities, including saw-cutting asphalt, will start in the area next week with excavation to follow. **ROAD CLOSURE NOTICE:** As part of this work, KUB crews will implement month-long daily road closures with access to driveways will be maintained. Additionally, temporary water service interruptions may be needed as customer service lines are connected to the new water main. Customers in the area may also experience temporary low water pressure as the system returns to normal following construction. Trapped air in water lines may temporarily cause the water to appear cloudy. Letting the water run for a few minutes at a faucet will allow the water to clear. The temporary cloudy appearance poses no safety issues with the water and will not harm household plumbing systems.

**Yard Restoration** – Grass planted as part of yard restoration in recently excavated areas may turn brown during periods of hot, dry summer weather. KUB's contractor will monitor those areas and re-address restoration sites as needed as temperatures decrease and favorable growing conditions return during the fall growing season.

**CCTV Inspections** – Contractor crews will be performing closed-circuit TV (CCTV) inspections of wastewater pipes and manholes at various locations across the entire Phase 3 area for the duration of the project. Due to the location of some manholes in the roadway, this work will require temporary lane closures with flaggers present to maintain traffic flow. Crews will also need to access manholes and pipes located in off-road easements.

**System Testing** – Contractor crews will conduct testing on newly-installed wastewater mains and manholes throughout the Phase 3 work area for the duration of this project.

**Restoration** – Crews will work to restore roadways, sidewalks, curbs, and yards in recently excavated areas across the Phase 3 zone. Work in roadways will require short term lane/road closures.
