

# Wastewater Collection System Rehabilitation Project

KUB contractor crews are scheduled to begin a wastewater collection system rehabilitation project in the Loves Creek area near the Chilhowee and Holston Hills communities (see map at right) in late December 2019. Construction is scheduled to run through December 2020.

Below is a step-by-step sequence of events that customers can expect related to wastewater construction in your area:

- 1. Pre-construction markings** – KUB or its contractor will identify the area where construction will occur with white paint.
- 2. Location of buried utility lines** – A utility locating contractor will arrive in the area within three business days to locate and mark other buried utilities with colored spray paint or flags.
- 3. Traffic/Parking** – Temporary lane and/or road closures will be needed in the immediate construction zone as work progresses. Appropriate traffic control measures will be implemented. Street parking may also be restricted in the immediate area where crews are working.
- 4. Construction/Digging** – This project will follow the existing wastewater pipelines and manholes in the area. Construction methods will include open-cut trenching, lining of existing pipe, and pipe-bursting. Digging may be necessary to install manholes and/or to connect your home or building's service lateral to the new main.
- 5. Water usage** – No planned service interruptions will be required as part of this work; however, you may be asked to limit water usage to minimize wastewater flows while crews are working in your immediate area. Crews will notify you in person or by door hanger 24 hours before requesting limited water usage.
- 6. Lawn/Street restoration** – KUB's third-party landscaping and paving contractors will complete restoration. Under normal circumstances, there may be about three weeks between digging and final restoration [weather permitting].

This information has been sent to you as a courtesy regarding planned KUB activity in your area. No action is required on your part; however, if you have questions or concerns regarding this project, contact Dexter Davidson, KUB Utility Service Advisor, at 558-2834 (office) or 415-8053 (cell) weekdays between 7 a.m. and 4 p.m. If you have questions after normal business hours, call the main KUB line at 524-2911.
