KUB's 2020 Water Quality Report is Now Available

KUB is committed to providing safe, high-quality drinking water to the community, and each year makes its annual Water Quality Report available both online at www.kub.org/2020kubwaterquality or by request to KUB at 865-524-2911. KUB performs many more tests than federal and state laws and the Environmental Protection Agency (EPA) require, and KUB's annual Water Quality Report outlines KUB's commitment to the community and excellent water quality record.

This report details our water quality record, stringent monitoring and testing, and the maintenance and renewal of our water system. KUB's water remains a great value at less than a penny a gallon all while KUB continues to replace aging pipe and expand reliable service to our growing community. Our water plays an important role in our community, supporting industry and the people that live here. KUB even provides refreshing drinking water at community events through the H₂O To Go mobile water unit, which also supports KUB's commitment to environmental stewardship by encouraging the use of reusable water bottles versus single-use plastic. Water is vital to our lives, and KUB is proud to provide this service to our customers.

To find out more about KUB's commitment to clean, safe drinking water, what you can do to protect our rivers, or the H₂O To Go mobile water station, visit www.kub.org/water.

KUB is a municipal utility serving Knox and parts of seven adjacent counties and provides electric, gas, water, and wastewater services to more than 464,000 customers.
